Abstract

Welcome another *Into the Odd* hack that is tuned for a world of Kerkenna, a stranded archipelago in the world of many other stranded archipelagos. With addition of Magic, Injuries and Quirks it became its own system that deserves its own little rulebook.

I Introduction

Yapping about Kerkenna for a quarter of a page.

2 Getting Started

Pick some dice, a Referee and make them do a game for you.

Choose a knight, roll stats, pick gear and go for it.

Scope

From one-shots to long adventures, but probably not a full campaign.

Knight Orders

Yapping about knights on Kerkenna

3 Basic Rules

Dice Rolls

To resolve some events a roll is needed. There are two mechanics that modify roll itself or dice in the roll.

Upface & Downface. Certain abilities can Upface and Downface a die. To Upface a die, find it in the sequence:

d1, d4, d6, d8, d12

And replace it with the next one. To Downface, replace it with previous one. d1 can't be Downfaced and d12 can't be Upfaced.

You probably don't have a d1 in your possession, but you can easily model it by using its property of always rolling the same face with 1 on it.

Highroll & Lowroll. There are several types of rolls: attack roll, virtue check, spellcasting roll and more. Many of them, including named three, can be Highrolled and Lowrolled.

To Highroll a roll, add a duplicate of a die that already exists in the roll. Perform a roll and then remove a die from it which shares amount of faces with the one added. Typically, you want to remove the lowest one, but ultimately its for you to decide which one to remove.

It is possible to double Highroll by adding two dice before the roll and then removing two that share amount of faces with those added. Naturally, this approach extends to any degree of Highrollness.

To Lowroll – do the same, but you must remove the highest dice for each degree of Lowrollness.

If there is a need to simultaneously Highroll and Lowroll remove High- and Low- pairs until only one type of "-rollness" remains.

It is possible to Highroll and Lowroll after the actual roll is performed. To do that choose a die that is present in the roll and roll it in addition to those already there. Then proceed as if they were rolled together.

Virtues

Main attributes of a knight.

Vigor. Strong limbs, firm hands, powerful lungs.

Clarity. Keen instinct, lucid mind, shrewd eyes.

Spirit. Charming tongue, iron will, fierce heart.

Focus & Stress

There are two important resources each knight has. The amount of thought they can put into perfecting a task and amount of effort they can put into a failed task to fix it. Those are tracked by Focus and Stress respectively.

Focus. When a roll is performed that can be effected by a character, they can spend Focus to enhance it. It **must** be declared **before** rolling the dice. For each point of Focus spent – Highroll that roll.

One can not only plot how to

enhance the roll, but also how to sabotage a roll. If one character can affect the roll of another in a destructive way, for each Focus spent the roll is Lowrolled.

Usually, a knight has no restriction how much Focus they can spend to enhance an action, but determining how much focus is possible to spend to oppose a given action should be discussed with Referee.

The order is important, so opposing characters decide how much Focus they spend simultaneously without telling each other. They both tell Referee in private and the roll is resolved afterwards.

Stress. Increasing one's Stress is done similarly, but **must** be done **after** the roll.

After a roll is made, a knight can decide that they are not satisfied with the result and try to fix it by acquiring Stress. For each gained Stress, Highroll that roll.

One can also acquire Stress to oppose an action after the roll is made.

Opposing characters decide how much Stress they spend simultaneously without telling each other. They both tell Referee in private and the roll is resolved afterwards.

Character can't spend Stress if they are at maximum stress.

After resolving an action, check if your stress is at maximum. If it is, set it to zero and the character suffers a Trauma(see Injuries section for details).

Attacks

Gambits, weapon dice, Feats, spells

Damage & Injuries

Scars, Injuries, Traumas and Consequences.
